BASEBALL

Acme 2, Crossfield 2. Airside to Play
Here This Evening (Thursday)

Crossfield and Acme put on a
real exhibition of baseball at the
local diamond on Sunday afternoon.
The score stood 2-2 at the end
of the ninth, when the game ended
in a tie. The umpire's decision at the
plate was protested the tying
run, although the man was safe
beyond a doubt.

Both teams played snappy ball,
the local club featuring with three
fast double plays, one unassisted by
Ronnie McFadyen. McFadyen had
the better of McCook in a real old
fashioned hurling duel. Errors in
the first and second enabled Acme
to score both their runs, while the
locals put over a run in the seventh
and tied the game up in the ninth.
This Garrison finish was too much
for the Acme team, and they pulled
that old time worn alibi of trying
to make the umpire the goat.

McFadyen pitched steady ball,
allowing the visitors two hits. Mc
Cook was also going big and held
the locals to six blows, one a double
by Frank Mair.

Score by innings:
Acme.....110 000 000—2 2 1
Crossfield..000 000 101—2 6 4
Batteries—McCook and St. Claire.
McFadyen and Fass.

Umpire—C. H. McMillan.
Crossfield—Gordon Johnson 2b, Bob
Smart 3b, Ronnie McFadyen p, Otto
Fass c, Frank Mair rf, Len Fuller ss,
Merle Heywood cf, Stanley Pogue lf,
Russell James lb.

Acme—Young H. Tillson ss, Pop Gwyn
2b, McPherson rf, F. McCook cf, Tillson
3b, St. Claire c, Lavalie lb, J. McCook p.

Airside and Crossfield will play
at the local diamond on Thursday
evening of this week at 6:30. Air-
side has been playing ball against
the city teams and we are told
they have a fair club.

Crossfield will play a re-
game at Acme on Sunday after-
noon next.

POLICE COURT NEWS

Four young men of no fixed
abode were picked up by Constable
Fenn at 4 a. m. Wednesday morn-
ing. They appeared before the
local Magistrate charged with vag-
rancy and on pleading guilty were
sentenced to 30 days in the Leth-
bridge gaol.

Having attempted to break into
Halliday & Laut's Store and fail-
ing to do so they succeeded in
breaking into the store lately vacat-
ed by Halliday. They will be
charged with breaking and enter-
ing before Police Magistrate Scott
at Calgary.

Two of these lads were born in
England, and are very anxious to
be deported as they are tired of
living under the present forced
conditions.

Crossfield Amateur Athletic Association

It is a shame to see boys and
girls of 'teen age grow up to men
and women, with nothing to do
other than stand on street corners
and talk about the latest scandal.
"Sania mens in sano corpore"—
a sound mind in a sound body—is
never more true than today. There
is plenty of talent around Cross-
field, but, as elsewhere, it needs to
be organized and trained. With
this idea in mind, Harry Fitzpat-
rick thinks it would be wise for
some of us to get together and
start something along these lines.
Harry has done some coaching
himself, and has had quite a few
pointers in the matter in the last
two or three years, so he says
"let's get together and do some-
thing." What do you say?

This district has been favored
with several light showers during
the past week which have helped
the crops considerably, although a
real good soaker is needed.

Many from the town and district
are attending the Calgary Stamp-
ede this week.

LEGION PICNIC

WED. JULY 19th.

The Crossfield Legion will hold
their annual picnic in the park on
Wednesday, July 19th, starting at
1:30 p. m.

Cremona Sports, July 19th.

Cremona will hold their big an-
nual Sports Day on Wednesday,
July 19th.

The baseball tournament will be
the feature of the day. There will
also be softball, horseshoe pitching,
and athletic events for young and
old.

In the evening there will be a
grand opening dance in the new
hall, for which the Modern Wood-
men Orchestra of Calgary has been
engaged.

The Sports Day is held under
the auspices of the Hall Committee
and a good time is assured.

The Crossfield baseball team have
entered the Cremona tournament
and arrangements are being made
for a number of cars to make the
trip.

Editor Crossfield Chronicle.

It is to be hoped that everyone
read the letters to the school in
your paper last week. They seem
to cover a good bit of ground, and
should be of help to the trustees in
choosing a new principal. "Inter-
ested" was doubtful as to whether
a married man would be better or
not as principal.

(1) The last three principals
have been single men, and, whilst
not picking on anyone of them
more than the other, it has been
obvious to anyone living in town
that they were all more or less
guilty of publicly showing their
affection for members of the oppo-
site sex. This may be a free country,
but a school teacher should refrain
from making advances to his lady
friend in public. Children are apt
to do as teacher does, and teacher
should really show a little sense in
the matter.

(2) Further, a married teacher
is likely to stay, if paid a fair sal-
ary, and will probably spend some
nights at home instead of just
rumbolling around. Most of all, per-
haps, a married teacher is likely to
be older and more experienced than
a single teacher. Crossfield seems
to have been a training ground for
principals, and the money saved in
getting a young man, without very
much experience, may be money
lost in the long run.

Let us have a man of experience
for our next principal,—a man who
knows something about discipline,
and who can be looked up to as a
master, not just as a play boy
playing winosope.

"Also Interested."

G. Y. McLean, successor to J. P.
Winning arrived here on Thursday
of last week from Hanna, and was
followed on Sunday by Mrs. Mc-
Lean and young daughter, and have
occupied the house lately vacat-
ed by Mr. Winning and family.
Mr. McLean in his younger days
was a teller in the Bank of Com-
merce at Vegreville, and your ad-
itor was acquainted with him as
such.

In spite of the misfortune of be-
ing Scotch and a banker, too, Mr.
McLean is a very likeable person.
Himself an amateur actor, he has
helped direct many a community
play, and his skill in this direction
is a great asset, if the rest of us
are not too lethargic and disinter-
ested.

W. W. Gibson passed away at
Theodore, Sask. on Saturday last
after a lingering illness. He is
survived by his widow at Theodore,
and by his father R. G. Gibson
and brother, Walter, of this town.

Mr. and Mrs. Pate Knight were
visitors in town on Friday last.
Pate won first money in the North
American bucking horse contest at
the Calgary Stampede on Tuesday.

Says Capitalist Nations Should Pool All Scientific Knowledge To Meet Soviet Trade Challenge

Warning that capitalistic nations must pool all scientific knowledge and trade secrets to meet the "challenge of Soviet Russia's industrial system and unemployment" was voiced before the American Association for the Advancement of Science.

Only by this means could the nations that now are in the lead industrially maintain this lead, said Dr. A. P. M. Fleming, engineer of the Metropolitan-Vickers Electrical Company of England, one of the 30 foreign scientists invited to speak before the summer meeting of the association.

"There is in the U.S.S.R.," he said, "a larger body of organized research workers under unified control than exists in any other individual country in the world. The Soviet government looks to science to play a most important part in its industrial and economic activities."

"Whether the Soviet plans succeed or fail, already enough has been accomplished to show the possibilities of this combined scientific effort. Even partial success may have far-reaching effects on the rest of the industrial world."

"This situation is developing at a time when there is little industrial co-operation between the other countries and there is no doubt that this challenge of a communal to a competitive plan justifies a careful consideration of the advantages of further co-operation especially in the matter of pooling of scientific resources and experience."

"With the lead that the foreign manufacturing countries jointly possess and with the fullest use being made of their joint scientific resources, it should be possible to meet the challenge successfully."

Navigates Her Own Craft

Twenty-one-Year-Old Nova Scotia Girl Has Master's Papers

Nova Scotia has almost as many sea captains as Kentucky has colons, with the difference that the Bluenose sailors have a better right to their titles because of experience, ability and valor. But one captain among them stands unique—unique because she is a woman.

Captain Mildred I. Wamboldt, 21-year-old native of LaHave, is probably the only female in Nova Scotia who not only owns, but holds master's papers and actually navigates her vessel. And the craft is no toy yacht. It is the 432 gross ton schooner E. P. Theriault.

"Why, I don't think I could live if I had to stay ashore," the pretty young sailor declared.

Born of a long line of sea-faring forefathers, she boasts that she hasn't been six months ashore in the past nine years. Bred to the sea, she made many trips with her father, Angus Wamboldt, Staten Island, N.Y., formerly of LaHave. There she made a special study of navigation.

Now her schooner is registered in her name. As master, she signs the clearance papers, transacts all the business of the craft, and rules with a firm hand her crew of one Nova Scotian and eight natives of Barbados. Her foster-parent accompanies her on her voyages, but only as mate. She trusts the schooner to no one but herself.

Captain Mildred is no fair-weather sailor. Last February she sailed from Turks Island with salt for New York, but when 250 miles from destination, the craft was caught in a terrific gale. The vessel was forced to turn and run before the wind. Her sails were stripped from her and her gear damaged. By the time the hurricane had blown itself out, the E. P. Theriault had been blown within 150 miles of Barbados. The young captain put into the islands, and sold her cargo there.

She makes Barbados from Shelburne in 16 days, and from Bridgewater in 17 and 18 days, on different voyages. She made a trip from Bridgewater to Turks Island in 13 days, all considered very good time.

The E. P. Theriault, built on the Fundy shore, is now registered at Bridgewater, Barbados.

Were Large Shoes

Chief attractions of the state museum in Missouri's state house at Jefferson City are a pair of shoes, size 22, once worn by Miss Ella Ewing. She was a native Missourian, who died several years ago, and was 8 feet 4 inches tall. She was supposed to be the "largest woman in the world" during her life.

Buildings in Miniature

Young Man Kept Busy Creating Models For Architects

Houses of cardboard and cases, of matches and slivers, of plaster and pigment, built on a drafting board with safety-razor blades and paper punches and old knives—that is the daily work of Al Allard, a young Minneapolis man.

Al Allard's interest in midsize buildings dates from that Los Chancy movie, "The Phantom of the Opera." Taking a tip from the miniature sets which were an important part of the picture, this handy young man built his first model, patterned after one of the castles used in the film. By contrast with the intricacy of detail which he has since developed and achieved that first affair was rather simple and inept. But at least it was a start, the first of several scores of models that have sprung from his work table. Chartered by the manager of the theatre where Allard worked and exhibited in a department-store window as part of an exploitation "gag," the little castle attracted much attention. It was brought to the attention of a Hollywood studio executive visiting Minneapolis. Critically the executive examined the little castle and promised to get in touch with Mr. Allard on his return to Hollywood. This he failed to do, but the miniature builder's enthusiasm and ambition had been fired.

Into the life of Mr. Allard burst a St. Paul architect bargaining with the architect. "Listen," commanded the architect, "I'm trying to sell a committee on the design for a new church, but they can't get together on it. I think if I had a model to show them they would like the design. I'll give you three weeks to finish the job and you can name any price within reason."

Night after night he toiled over the little church, sitting in every beam and brick. The architect got the contract.

His experience as a creator of these little houses, castles and cathedrals has not only shown him the way toward achieving distinctiveness and the appearance of reality, but has also been an instructor in many of the fundamentals of architecture and has developed in him his own credo of philosophy of this craft—Progress.

Victim Of Imagination

"Cancer-Phobia" Causes Man To Take His Own Life

Perfectly healthy for a man of his age, William Dyan, 60, of Fernow Road, Paddington, England, became so obsessed with the idea that he had cancer that he killed himself—a victim of pure imagination.

Holding an inquiry at the Paddington corner, Mr. Ingley Oddie, pointed out that it was a common mistake for people to imagine they had cancer, and commented: "This is a case of cancer-phobia."

The evidence made it clear that Dyan had committed suicide as a direct result of depression induced by thinking that he had cancer.

Medical testimony made it equally clear that the man had no disease whatsoever.

Not In His Line

Paddy, who was eager to obtain work went to the employment exchange.

"Anything this morning?" he asked the clerk.

"Yes," said the clerk, after consulting his books, "there's a job at the Eagle Laundry. Do you want it?"

Paddy shifted uneasily from one foot to another.

"Well," he said, "it's like this, I really want work mighty bad, but the fact is I ain't never washed an eagle."

Not Wanted in Canada

It has been pointed out that the average family on relief in Canada is much better off than a family of workers in Russia. This does not, of course, help to lessen discontent in this country or assuage the feelings of those who prefer work to relief, but it points the way that Bolshevism is no cure-all for the present conditions or one to be at all invited.

"Nature is an original artist," we read. That is why she so often seems to copy the pictures on flower seed packets.

China expects excellent crop yields this year.

Selling More Art Treasures

Earl Of Egmont's Priceless Silver Plate Being Sold As Art Treasures

More treasures of the treasurer Earl of Egmont are to be sold at Christie's in London. The old masters and other pictures inherited by the late Earl have already been dispersed, and now the massive silver plate is coming into the auction room.

It is only four years since Frederick Joseph Trevelyan Percival left his ranch in Alberta and went to England to settle at Avon Castle, Ringwood, Hants, as the tenth Earl of Egmont. The silver plate now to be sold contains a good deal of 18th century silver salvers, meat dishes, and the like, several of which were especially made for the second earl.

The most important item is a rare James I. silver-gilt wine-cup, a relic which had been presented to Lord Arden, another branch of the family, by Princess Elizabeth, afterwards Landgravine of Hesse-Homburg, for use in his chapel at York. The Baron Arden was a Lord of the Admiralty about the end of the eighteenth century, and was M.P. successively for Launceston, Warwick, and Totnes.

A set of three George I. caskets is another rare item bearing the name of the celebrated London silversmith, Paul Lamerie, 1725.

A German silver-gilt tankard has an inscription showing that it was presented to Lord Arden by Queen Charlotte, the consort of George III.

Dominion Offices For London

Headquarters Are All Together In Heart Of City

The opening of the handsome new office of the government of South Africa by the King was interesting as another development of the bunching together of the Dominion offices in one particular part of London, England.

The South Africa building occupies one of the most commanding sites in the capital of the Empire at the corner of Trafalgar Square and the Strand, looking down Whitehall and over the street to Charing Cross. Generations of Londoners and overseas visitors know the building which stood there before—Morley's Hotel. Right across from it on the opposite corner of the Square, is Canada House, the offices of the High Commissioner. Between these two points and on the south side of Trafalgar Square are the offices of the Canadian Pacific and the Canadian National Railways. A few yards further west up another street are the offices of the British Columbia government. There is also a Canadian bank hard by.

Going past along the Strand are the premises of the government of Rhodesia, the offices of the province of Ontario and almost opposite the latter the Australian offices.

So that the overseas visitor seeking his headquarters is right in the heart of London wherever he comes from.—St. Thomas Times-Journal.

The world's supply of copper at the 1929 rate of consumption will only last about fifty years, in the opinion of certain scientists.

By lighting and heating a bee-hive by electricity in Europe recently the production of honey was increased 17 pounds.

Winnipeg Newspaper Union

By Ruth Rogers

TAKE OFF YOUR COAT! JUST AS YOU PLEASE!

It's smart as can be either way.

As everyone knows Dame Fashion is very fond of capes for spring.

And here's a darling model that is very versatile. Take off the cape and you have another dress.

Dawn blue crinkly crepe silk carried out this fascinating model.

A crepe silk print would be charming too.

Style No. 712 is designed in sizes 14, 16, 18, 20, 22, 24, 26 and 28 inches bust.

Size 16 requires 4 yards 39-inch, with 3/4 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Things That Count

Things that help one to succeed and light: Visit of your neighbor's hens to your garden; the hiding in your favorite tulip bed of a bone by a vagrant dog; the early rising neighbor who plays a lively tune on his lawn mower just as you are getting off to your morning's sleep.

There is more kick in anticipation than in realization.

Prince Of Wales Expresses Confidence In Canada's Ability To Emerge From Depression

Very Easy To Obtain

Newspaper Claims Untraceable Poison Sold Freely In England

Two drugs capable of killing a man without trace are on sale at large chemists throughout the country, says a London newspaper.

They are supplied without question to any person who demands them. One of them bears no "poison" mark on its bottle.

Neither of them can be detected after death.

Many poisonous substances are obtainable from all chemists, but these two are remarkable for the ease with which they are bought, for the impossibility of tracing them once they have been administered, and for the fact that they produce symptoms similar to those due to natural disease.

The pathologist of a famous London hospital, questioned by a newspaper representative about one of these substances, said "If ever I wished to commit murder, this is what I should choose."

It is a protein-like compound, in daily use for the treatment of a common disease. It is supplied as a liquid in tubes which bear no poison mark. A child can buy it anywhere.

And yet the injection of the contents of a two-shilling tube induces coma followed by death in from four to six hours.

It is impossible to analyse, and it leaves no trace in the body after death.

A newspaper representative visited a chemist's shop near Oxford Street, and for two shillings he received a tube containing more than a fatal dose of the liquid.

The second deadly poison is a liquid made from the seeds of an Indian tree. The medical dose is one drop, and an overdose results in an exceedingly painful death.

Two grams are enough to produce fatal results.

It, too, is impossible to detect after death.

At the same shop, two grams of the poison were bought for 1s. 6d. For this it was necessary to sign a receipt, but no steps were taken to verify the name and address given, and it was not asked to what use the drug was to be put.

Chemical Changes In Liquids

Scientists Find High Pitched Sounds Will Kill Bacteria

If the baby could cry at a higher pitch he might help make his own milk more digestible.

A study of the effect of sounds in causing chemical changes in milk was reported to the American Association for the Advancement of Science by Dr. E. W. Ford and L. A. Chambers of the University of Pennsylvania Medical School.

Scientists have recently learned that bacteria in milk, water, fruit juices and other liquids can be killed by "super sounds" of very high pitch.

Less than one-twentieth of the people in Britain now pay income taxes.

The Prince of Wales told 700

guests at a Dominion Day dinner he was confident of Canada's ability to emerge from the economic depression and proceed to a bright future.

Standing beside Prime Minister R. B. Bennett, of Canada, and addressing an audience including representatives of every phase of empire life, the prince said: "I know Canada better than any other part of the empire. I am really quite ashamed to think a year has elapsed since I have been to my ranch in Alberta; not that my residence at High River or any effort on my part could alter the price of cattle or vary the exchanges."

"Canada," he continued, "is suffering with the rest of the world. I am proud of my association with her, and am confident, as her citizens are confident, of her recuperative powers and bright future."

The Prince dealt briefly with the struggling world economic conference and last year's Ottawa economic conference which brought together representatives of all the empire nations.

"The hopes of the world," he said, "are fixed just now on the economic conference, but our mind naturally goes back to a year ago, the eve of the Ottawa conference."

"Quite apart from the discussions and agreements then made, that gathering showed the world that here is a great national unit able by the very nature of its composition to meet in unanimity the price of cattle or vary the exchanges."

"We all know," he said, "that the work of the economic conference would be beset with very great difficulties, but we must be confident for the sake of the world."

"Not the least impressive feature (of the world conference) to be declared," he said, "is participation in representation of various parts of the great British Commonwealth of nations." Those nations of the commonwealth, he said, come with best wishes to the "great task of helping put the world on the road to economic and financial recovery."

Where Men Excel

Better Than Women At Guessing What Children Like

Men are more adept at selecting amusements for children than are women, says Florence Bamberger, one of the two women professors at Johns Hopkins University. Men know better what children like; women know better what is good for them, she contends.

Miss Bamberger bases her belief on an experiment she conducted in compiling information for a volume in the art of decorating children's books. In this, she discovered men were able to select subjects that appealed more to children than were women. The reason for men's ability along this line, she thinks, comes from the fact that the time they spend with the children is largely in play. Women are occupied with the technical aspects of rearing children.

Selling Big Japanese Coin

Largest Gold One In World Weighs Nearly Four Ounces

The Japanese Oban, the largest gold coin in the world, is to be sold in London, England.

Stamped with the seals of the government mint, the Japanese Oban is a large oval plate of gold measuring five inches across, and weighs nearly four ounces.

The coin was signed in Japanese ink by the superintendent of the mint as a guarantee of its purity. The signature was considered the most important part of the coin, and it was rubbed off the plate ceased to be current money.

Had Long Wait

When Peggy returned from her first day at school she was asked how she enjoyed it.

"I like it all right," said Peggy, "but I didn't get any present."

"What made you think that you would get a present, dear?"

"Teacher said 'Oh, there for the present'; and I sat there all morning and never got one."

Brazil's Surplus Coffee

Brazil this year will have the biggest crop of coffee in history, millions more bags than the world would use. It looks as if that country will have to continue its bounties, having already burned more than 15,000,000 sacks.

Here we see His Majesty King George leaving Victoria Station with King Faisal of Iraq on their way to Buckingham Palace where the Arabian monarch is to stay for a few days. King Faisal is acknowledging an enthusiastic reception by the people of London.

WORLD HAPPENINGS
BRIEFLY TOLD

The Canada-South Africa trade agreement, negotiated during the imperial economic conference in Ottawa last summer, has become effective.

The world disarmament conference has been adjourned on Oct. 19 despite a protest by Rudolph Nadeloy, Chancellor Hitler's representative, that the long recess amounted to a first-class funeral for disarmament.

Approximately 2,500 single unemployed men are in Vancouver receiving no assistance from either city or province because of their refusal to go to relief camps or because they left these establishments.

E. L. Bushnell, director of radio station CKNG, Toronto, has been engaged by the Canadian radio broadcasting commission to make a tour of the western provinces to organize programmes from this area.

Detention for 28 days was the sentence meted out to Guardsman Harris, sentry at Windsor Castle, following a court martial. Harris was found asleep at his post while the royal family were in residence some time ago.

A plea for an even greater measure of co-operation between all nations in the fight against tuberculosis was made by Professor S. Lyle Cummins, of England, noted authority on the disease, at the annual dinner of the National Tuberculosis Association held in Toronto.

Dr. John M. Chapman, associate professor of banking at Columbia University, in an address before the round table on money, banking and financial affairs, at the Institute of Public Affairs, said that the United States "bank failure movement is not ended."

Seven speedy destroyers used by the United States coastguard for years to chase rum runners and other smugglers operating off the Atlantic coast have been turned over to the navy because the government's economy programme necessitated a reduction in expenditures.

Has His Own Method

British General Taught Himself Eight Or Nine Languages

Lieutenant-General Sir Edmund Ironside has exchanged what was practically a sinecure at the Tower of London, England, for an active part by his new appointment as Quartermaster-General of the Forces in India. As the youngest general officer in the British Army for many years—still less than fifty-four years old—he will now have an opportunity to use his keenness to the full. He taught himself the eight or nine tongues he knows by a method of his own, memorizing every day a score of nouns and adjectives. Verbs come in their own good time, and if he is ever at a loss for one, he bridges the gap by an eloquent gesture and carries on with the work.

Learning To Work

Many Opportunities On Farm To Learn Use Of Head and Hands

During the long summer holidays boys on the farm can find plenty to do learning to work, and it is very important that opportunities should be found for them. Boys need to be able to use their hands expertly as well as their minds. If not they will find the raw rough and steep at the outset of life. Girls have the chance to learn to work in their homes, under the direction of their mothers, the best of all teachers. Of course a boy should have some time to play, but idleness is a great stumbling block in the way of life, and is a surer road to death than work.

Selling Wheat Abroad

Almost Sixty Countries Purchased From Canada Last Year

Canadian wheat last year was sold to almost 60 countries, made up of 20 within the empire and the balance beyond empire boundaries. Of the total of 140,000,000 bushels to empire ports no less than 135,000,000 bushels went to the United Kingdom.

France and Belgium purchased each about 14,000,000 bushels; Italy and the Netherlands together accounted for 21,000,000 bushels; China and Japan, 13,500,000 bushels; Germany, 6,000,000 bushels; and Greece, 5,000,000; Norway, Sweden and Peru purchased about 1,000,000 bushels each.

Industrial activities in Sao Paulo, Brazil, are increasing.

More than 1,250,000 radio sets were sold in England last year.

Canadian Authors Tour Britain

Party of Fifty Will Visit Literary Centres Of the British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed (by ship) on the "Empress of Britain" for a tour of the literary centres in the British Isles. They will be met by some of the most distinguished authors of Great Britain and will experience the advantages of personal contacts with the scenes depicted in English literature including the country of Hardy's "Tess" the spot where Keats wrote "Ode to the Nightingale," Westminster Abbey, Dr. Johnson's house, the Inn made famous by Sam Weller, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns' country, and other centres of literary interest.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Masefield, Sir Henry Newbolt, J. B. Priestley, John Drinkwater, and George Bernard Shaw. There will also be recognition by leading public bodies and parliamentarians.

The Canadian Authors' Association was organized in 1921 with a view to promoting the interests and craftsmanship of Canadian authors. It has branches from coast to coast and a membership of about 800. The association has helped to disclose the very substantial contribution which Canadian writers are making to current literature—a contribution which had to some extent escaped observation due to the fact that a large part of Canada's literary production finds its way to the public through the channels afforded by publishing houses in the British Isles and the United States, with the result that numbers of well-known Canadian writers were commonly regarded as being Englishmen or Americans. During the 12 years since the association was organized great advances have been made in the Canadian publishing industry, particularly in the field of magazines and literary periodicals.

Winnipeg Newspaper Union

By Ruth Rogers

YOUR NEW BLOUSE WITH THOSE SMART FULL SLEEVES AND BECOMING TAILORED

Here's a charming new model which has lots of good style about it. Yet as you can see, it is exceedingly simple to fashion, yet every detail conforms to the dictates of the mode. White crinkly crepe silk made the original.

It is also lovely in grey, maize, light blue or eggshell.

Style No. 701 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 2 1/2 yards of 29-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

CHINESE GENERAL AIDS POULTRY IMPROVEMENT

General H. H. Den, commander of the 28th Chinese Army who has given his cheque (shown above) for \$500 to construct a modern poultry barn for Canadian breeding stock recently donated to missionaries in his district by Vancouver men and the University of British Columbia. Rev. Frank Dickinson, M.Sc., late of Yarmouth, N.S., is in charge of agricultural projects, including the improved poultry plan.

Great Masonic Gathering

Duke Of Connaught Opens New Headquarters In London

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the not inconsiderable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 15 lodge rooms, a large museum and library and extensive administrative offices. The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

Only One Reigning Queen

Wilhelmina Of Holland Has Celebrated Silver Jubilee

Wilhelmina of Holland has the distinction of being the only reigning woman monarch in the world. Her Majesty, who is 82 years of age, has already celebrated her silver jubilee, being crowned when 18 years old. She spends most of her time at her country palace near Apeldoorn, where she paints water colors and goes long rides daily. Her court is very simple. Wilhelmina speaks several languages and is also a bridge and golf enthusiast. Visiting statesmen present at the openings of her parliament all remark on the clarity of her enunciation.

Something Worth While

Investment In Youth Is Most Exciting Speculation Known

In times like these invest in boys and girls. Men talk about buying stock at the bottom. When you invest in a boy or girl you are always buying at the bottom. You are sure that the youngster is going up, and there is no telling how far. I invite every man and woman in America to take a flyer in Childhood Preferred. I predict a great future for this security. It has investment merit combined with the most exciting speculative possibilities. You are sure to get a man or a woman; you may get a great man or a great woman.

CYCLIST: "I don't care who you are, I'm going to speak my mind." LADY DRIVER: "Please don't. I'm sure you haven't a nice one." —The Humorist, London.

SUNDAY SCHOOL LESSON

JULY 16

DEBORAH

Golden Text: "God is our refuge and strength. A very present help in trouble."—Psalm 46:1.

Lesson: Judges, Chapters 4, 5.

Devotional Reading: Psalm 46:1-3, 8-11.

Explanations and Comments

Israel Oppressed By Sisera, Captain Of Jabin, King Of Canaan, Chap. 4:1-3.—"It is easy to fall to discover a great crisis between the verses of an old narrative, but this was a great crisis. Here was a weak and struggling people, whose future was of immense consequence to the whole history of religion, charged with a mighty spiritual destiny, and in danger of just ceasing to be anything at all before they had even begun to be what they were meant to be. Their spirits were broken; those chariots drove across their very soul. If ever their leaders came together, they said: 'It's no use, Sisera is too strong for us; we have only foot soldiers, poorly armed. If we should rise against Sisera, he would only ride us down the more surely! And then, when the men were of no use at all, a woman turned the tide of history.'"

"Something very much like that happened in France. Five hundred years ago, England held France in the hollow of her hand; the spirit of the French was broken. The State was divided; the king was a poor weakling with no thought but of his own pleasure. Then a peasant girl, 'heard' voices, and her soul kindled within her. She touched the smouldering spirit of her race with her own kindling fire; she saw her king crowned in grey old Rheims Cathedral, and there she herself died a martyr to the stupidity and treachery of her time, all the world remembers Jael of Arca. There is no limit to what a kindled soul can do when the time is ripe."—Gates Glenn Atkins.

Sisera's Challenge To Deborah, Chap. 4:4-7.—Deborah was a prophetess and the judge of Israel at this time. She was accustomed to sit under the palm tree of Deborah, and declared that was the judgment of God in naming her, and she settled disputes among men. On a coin of the Roman Empire, which represented the capture of Jerusalem, Judea is pictured as a woman seated under a palm tree, captive and weeping. "It is the contrast of that figure which will best place before us the character and calling of Deborah," Dean Stanley writes. "It is the same Judean palm under whose shadow she sits, but not with downcast eyes and folded hands and extinguished hopes, but with all the fire of faith and energy, eager for the battle, confident of the victory."

With faith in God's directing hand such as empowered Joan of Arc for her task, Deborah summoned Barak and ordered him to raise a force of ten thousand men from the tribes of Naphtali and Zebulun and attack Sisera with his chariots and his mail-clad troops at the River Kishon. Those two tribes were called because they were the most interested in defeating the oppressors, for their territory bordered the Plain of Esdraelon. "Deborah is speaking in the name of Jehovah."

Fruit Popular In Canada

Consumption Of Apples, Oranges and Bananas Is Heavy

Notwithstanding the fact that the people of Canada eat more eggs and butter than the people of any other country and register high as meat eaters, they also enjoy fruit. The statisticians of the Canadian Government have just released the figures on fruit consumption in Canada for the fiscal year ended March 31, 1933, which show that the domestic consumption of apples was 2,272,100 barrels, of oranges 2,683,471 boxes, and 3,325,000 stems of bananas. On the basis of the population of 10,506,000 the average per capita consumption was about one-fifth of a barrel of apples, more than one-quarter of a box of oranges, and less than one-third of a stem of bananas.

The total domestic consumption of the commercial apple crop grown in Canada has been fairly consistent during the past ten years, varying in somewhat the same manner as commercial production, whereas imports show a gradual decrease which has been more rapid during the last two years. Bananas show a steady increase in imports, but with a drop during the 1932-33 season to about the 1927-28 level, although the population has increased at a greater rate and during the last three years consumption per capita has declined. Imports of oranges vary from year to year and show no decided trend to decrease or increase, which trend is also lacking in the consumption per capita.

U.S. Population Increases

The population of the United States has increased 2,917,954 since April 1, 1930, to a new high of 125,693,000. So declared the census bureau in presenting some complicated additions, subtractions and divisions arrived at by estimating the increase since the 1930 census on the basis of the available data regarding births, deaths, immigration and emigration.

To Measure
Wind Resistance

Seven Hundred Miles-An-Hour Tunnel Built At English Laboratory

Important improvements in the range and accuracy of shell and rifle fire will result, it is hoped, from a new 700 miles-an-hour wind tunnel, which is to be constructed at the National Physical Laboratory, Teddington, England.

The tunnel will provide the fastest stream of air which has yet been produced—with a velocity nearly equal to that at which sound travels through air. This will render it possible for the first time for wind resistance to be measured at speeds closely approximating to the highest muzzle velocities obtainable.

As a result research workers will be able to obtain exact data on the relative merits of projectiles constructed with various modifications to existing standard shapes. Instead of elaborate and costly gunfire trials with projectiles the whole work will be performed in the laboratory. The air will rush past the shell instead of the shell rushing through the air.

The chief directions in which improvement may be expected are in increased range in the case of shellfire, and greater resistance to "drift" due to a sideways wind, in the case of rifle-fire. In the latter case it will be possible to reproduce the full effect of lateral wind of any desired strength by placing the bullet to be tested at a small angle to the 700-miles-an-hour sale.

The importance of such practical tests lies in the fact that hitherto it has proved impossible to make precise calculations of air resistance based on theory alone. With both ships and aircraft it has been found that important improvements can be obtained by apparently insignificant changes in design.

In the method which will be adopted, the projectile will be suspended in the wind tunnel by an apparatus which will automatically record the various forces exerted on the projectile. This record can be transmitted by electrical means to an observer outside, who has as full a knowledge of everything that is happening to the projectile as if he were in the tunnel.

The new tunnel is to be constructed in order to make use of the enormous pressure developed in the laboratory's compressed air tunnel for aircraft testing, which is ready to begin work.

When testing in this tunnel is completed, the air it contains, which exerts a pressure of 15 tons on the square foot, will be released through the new projectile tunnel. It is estimated that the blast of air will last for about twenty minutes at the full speed. In addition to projectile tests the tunnel will be used to measure the forces on the tops of aeroplane propellers, from which other improvements are expected.

The creation of the compressed air tunnel, which alone makes the projectile tunnel a possibility, is a minor triumph for the British steel industry. It was necessary to build the containing building round it. The whole has been tested up to the record—more than 500 pounds a square inch—more than forty times the normal pressure of the atmosphere.

Taking Wonderful Trip

Party Of Ten Hawaiian Boys On Way To Yukon

When R.H.S. Monowal docked in Vancouver, it was the end of another journey for most of the passengers, but for 10 boys from Hawaiian Islands, it was arrival at the stepping-off place for magnificent adventure.

They are members of a party from Bushak school, under direction of Mr. Bayne Beauchamp, and their destination is Yukon and Alaska, where they will do nothing at all except: Travel 1,600 miles on the Yukon River in small boats; prospect for gold; botanize; take samples of plankton (minute fish food); take moving pictures. They have arranged for some boats at Whitehorse, and will build others.

The boys, ranging in age from 14 to 17, were picked for their physical and mental ability. They will visit Dawson, Fort Yukon and Tanana on their trip down the Yukon.

Trilled Their Chief

In the first use of the new radio equipment for fishermen, the chief constable of Nottingham, England, broadcast the description of a man wanted, the cruiser car jumped on the trail; and when they stopped the "fugitive" driver they found he was the chief constable himself.

You need to be broad-minded to live in a narrow-minded community.

WORLD PARLEY IS SAVED FROM UTTER COLLAPSE

London, Eng.—The world economic conference, on the verge of collapse, was saved from complete failure by united action of Prime Minister R. B. Bennett of Canada and President Franklin Roosevelt of the United States.

Decision of the conference steering committee will permit the meeting to continue on a restricted agenda, from which all monetary and tariff questions were removed at insistence of France and the European gold-bloc.

A sudden switch in the American attitude, dictated in a telephone conversation between the president and Secretary of State Cordell Hull, placed the United States firmly behind continuation and received immediate, vigorous support from Mr. Bennett.

The energy of Mr. Bennett's appeal in turn won over Neville Chamberlain, British's Chancellor of the Exchequer, who had been only lukewarm toward the idea of continuing under present circumstances. When the vote was taken France alone of the 12 nations represented on the steering committee held out for adjournment.

The gold group had regarded Mr. Chamberlain as leaning to their view, but the force of Mr. Bennett's argument, representing as it did the wishes of all the British dominions, swung him quickly to their side.

The stand of Georges Bonnet, French Finance Minister and leader of the gold-bloc, was weakened in the final stages of debate by recalcitrance of other group members.

In the end even Premier Horeau of Holland, strong supporter of gold policy, voted in favor of continuing.

Future outlook of the conference however, was limited by French and gold-bloc insistence they will not participate in any discussion of monetary questions.

The steering committee recessed at lunch, after three and a half hours of heated discussion without reaching any decision upon the question of adjournment. Reassembling after lunch, the delegates decided to continue.

Leaving the meeting, Prime Minister R. B. Bennett of Canada expressed himself as "glad with the proceedings of the bureau up to this point."

It was well known Mr. Bennett was leading delegates of all the dominions in a strenuous fight to save the conference from dissolution.

He was understood to have strongly stressed during the heated morning session that a recess of the conference at this time would be a step in the wrong direction.

Prime Minister Bennett is the only delegate from the dominions who is a member of the steering committee, limited to 12 of the leaders. But in opposing adjournment of the conference he was presenting a view in which they all concur.

When the steering committee disbanded the point at issue was the program of conference work submitted by Cordell Hull of the United States. The French were opposing the American program. They are willing to leave the conference in being only for discussion on marketing and production of commodities.

Goodwill Air Tour

Twenty-Five Planes From Winnipeg To Tour Western Provinces

Winnipeg, Man.—Under the leadership of T. M. "Pat" Reid, well-known war-time aviator, the third annual Manitoba goodwill air tour will cover the three prairie provinces this year, it was announced Thursday.

Between 20 and 25 planes will sweep westward as far as Edmonton, taking off from Winnipeg Aug. 5 and returning Aug. 20. Aim of the air tour is to demonstrate speed and safety of aerial travel and progress Canada has made in aviation.

Historical Page At

Prince Albert, Sask.—Four hundred performers will take part in the historical pageant being prepared for the golden jubilee Prince Albert annual exhibition July 31 to August 3 inclusive. One hundred and eight small girls, 64 young men and 212 young women will be required for the production being prepared for presentation before the grand stand.

W. N. U. 2002

Plan New Processing Tax

U.S. Farm Officials Expect Large Returns From Levy On Hogs

Washington.—United States farm administrators have drafted tentative plans calling for a processing tax on hogs by Oct. 1 to provide up to \$150,000,000 to finance application of the Farm Act to corn and swine. The plans will not take final form until after a meeting of corn and hog producers and their representatives which secretary of agriculture Henry Wallace has suggested be called in mid-July to obtain a cross-section of sentiment regarding the relation of the act to the two related products of the corn belt that have suffered from low prices in recent years.

If the levy is approved in connection with a corn-hog program to be worked out by August 1, it would be the fourth processing tax to go into effect after winter sets in. The 3-cent a bushel wheat tax became effective at midnight, July 5; a maximum processing tax on cotton, probably four cents, is to become effective on August 1 if the acreage reduction campaign now under way in the cotton belt succeeds, and a processing tax of about six cents a pound is to be levied on cigar leaf tobacco by October 1.

Death Toll Was Heavy

Accidents Take 144 Lives In U.S. On Independence Day

New York.—Lives of 144 men, women and children paid for the celebration in United States of July 4th, 157th anniversary of the republic. Automobile accidents accounted for 62 deaths; 46 persons drowned; 30 died as a result of fireworks, and 30 were killed from other accidental causes. Thousands of other celebrants suffered injuries, many were critically hurt and property damage was heavy. Shootings, fights and airplane accidents contributed to the death toll.

In Chicago a parachute jumper fell to his death before 100,000 horrified spectators at the world's fair.

Peculiarly, Chicago, the play centre of the nation as the result of the Century of Progress, escaped with but three automobile fatalities despite the crowded streets that poured massive crowds into the world's fair ground.

Electrify Grain Elevators

Big Program Of Work Is Started In Alberta

Calgary, Alberta.—An electrification program for 175 Alberta grain elevators, to cost \$125,000, has been started today by the Calgary "Albertan." All switching and control equipment will be manufactured in Canada. Eastern manufacturers will turn out about 400 electrical motors, the paper adds, the co-operation of elevator companies, equipment manufacturers, contractors and officials of the Calgary Power Company, power supply source, making the program possible. The work will bring jobs to men at present unemployed, the paper concludes.

Demand For Canadian Wheat

World Grain Show Delegate Sees Good Market In Britain

Winnipeg, Man.—"I look for a much broader demand for Canadian wheat in the United Kingdom market in the near future," said William Smith, Edinburgh, Scotland, manager of the Scottish Co-Operative Wholesale Society, who arrived in Winnipeg. Accompanied by Neil Beaton, newly elected president of the society, Mr. Smith is en route to the World Grain Show at Regina this month.

To Repair Vessels

Kington, Ont.—One hundred men will be employed for the next three weeks or a month repairing the Canada Steamship Lines grain carrier "Brentwood" at Kington. Tuesday morning a score started work on the vessel, damaged when it ran aground a few weeks ago en route here with a cargo of grain. It was announced the job would cost between \$70,000 and \$80,000, the highest repair job in the district for some years.

Chinese Feel Insulted

Chicago.—The Chinese Consolidated Benevolent Association protested to the Century of Progress Exposition officials against the inclusion of the southern Manchukuo exhibit in the Japanese concession at the exposition. A letter signed by Chew Low, president of the association, called the exhibit "a direct insult" by the Japanese.

Would Become Citizen

Verein To Apply For Naturalization Papers

Kamsack, Sask.—Making his first appearance in public since he was released by order of Mr. Justice R. A. Robson at Winnipeg from custody of immigration officials who had twice attempted to deport him as an alien, Peter Vereg, Doukhobor leader, told 2,000 of his followers from all parts of Saskatchewan and Manitoba, he had completed his five years' residence in Canada and he intends to apply for naturalization papers.

In the course of an address which dealt largely with religious matters, the spiritual as well as temporal head of the Christian Community of Universal Brotherhood, appealed to his audience to donate money to help suffering members of the community in Russia.

Independent Doukhobors at the meeting expressed the opinion the first duty of the community lay towards those of Canada's 16,000 Doukhobors who are suffering.

To Brave Niagara

Plans To Go Over the Falls In a Barrel

Niagara Falls, Ont.—Planning to venture over the foaming cataracts of Niagara Falls, Alfred Rioux, of this city, is scheduled this month to make the daring plunge, encased in an iron torpedo-shaped barrel.

The barrel Rioux intends to use, is of steel construction with a port-hole looking from the inside.

Rioux intends to plunge over the Horseshoe Falls and through the lower rapids to Queenston.

Case Is Completed

Ottawa, Ont.—Hon. Lyman P. Duff, chief justice of Canada, and Justice Willis Van Derwerker of the United States supreme court, sitting as special commissioners, have completed their investigation into the "Tim Alone" sinking, and will render their report to the governments of the United States and Canada.

GRAIN TRADERS PONDER FUTURE MARKET TREND

Winnipeg, Man.—In the face of dwindling export business in Canadian wheat and the largest surplus Canada has ever had at this time of year, recent spectacular rises in wheat prices here have caused more conservative traders to pause and consider the picture the grain market is likely to present in the near future.

United Kingdom importers showed less and less disposition to increase their stocks of wheat by buying Canadian grain. Traders are inclined to look to the importer for the key to what levels wheat prices will ultimately reach and hold.

Statistics on export trade would indicate the buyer in Europe has followed a hand-to-mouth policy for some time. Wheat stocks in the United Kingdom ports which exceeded 30,000,000 bushels in November, 1931, stand today at slightly more than 12,000,000 bushels, while mill stocks are also reported extremely low.

RUSSIAN DELEGATE AND HIS ENGLISH WIFE

Here we see V. Litvinov, leader of the Soviet Union delegation to the World Economic Conference, leaving the Geological Museum, where the conference is in session, with his wife, who is an Englishwoman.

HEADS ROTARY

John Nelson, native of Paisley, Ontario, and at one time editor or publisher of several leading Canadian newspapers, who was unanimously elected president of Rotary International at the meeting in Boston.

Whales From Churchill

To Be Placed On Exhibition At Chicago Fair

Saskatoon, Sask.—Saskatoon imported its first fish from Churchill—twenty saltwater herring for local dinner tables. And the herring will be eclipsed by three white whales, destined not for dinner tables but the world's fair at Chicago.

Procured for the Chicago show, the whales were caught off Churchill on June 29 and it is expected that they will make their first public appearance here during the next few days. S. H. Stebbings, Saskatoon, is endeavoring to make arrangements for showing them in a local cold storage plant.

The snowy whales are in ice for the train journey south. Mr. Stebbings also expects to complete arrangements for a showing this summer on the class "A" western fairs circuit.

May Take Vacation

Health Of Sir John Simon Is Causing Anxiety

London, Eng.—The health of Sir John Simon, British Secretary for Foreign Affairs, is causing increasing anxiety to his friends and it is understood he may take a long vacation, probably at sea.

A peerage for him has been mentioned if the low blood pressure, from which he is suffering, makes his continuation in office inadvisable. He was reported to have sold his country estate, Fritwell Manor, in Oxford.

Princess Royal Must Rest

Only Daughter Of King George Cancels All Engagements

London, Eng.—It was announced today that the princess royal has cancelled all her engagements.

"There is no reason other than that her royal highness has to rest," it was stated at her London home.

The Countess of Harewood, the princess royal, is Mary, the only daughter of King George and Queen Mary of England.

Receive Warm Welcome

Thornton and MacDonald Reach Home After Release From Soviet Prison

London, Eng.—Cheers, flowers and kisses awaited L. C. Thornton and William MacDonald as they arrived here, released by the Soviet authorities from prison where they were serving sentences imposed on conviction of bribery and espionage.

Thousands thronged the station platform to welcome back the men whose freedom was obtained by the British embargo on Russian trade.

Thornton's little daughter somehow was passed through the crowd to her daddy's car almost before the train stopped and was immediately in her father's embrace.

Thornton declared he and MacDonald were full of gratitude to the British government and the British people for so staunchly taking action which resulted in their release.

He also expressed gratitude to Sir Edmund Ovey, former British ambassador in Moscow and gratification at the confidence their own company had shown in the accused.

Utters Warning

Says U.S. May Demand West Indies In Payment Of War Debt

London, Eng.—Warning the British West Indies might some day be demanded by the United States in payment of the British war debt, and declaration public opinion should be fully prepared, was uttered Thursday by Archbishop Jullien of St. Kitts, preaching at the annual West Indies service at St. Andrews Church, Queen Victoria Street.

A certain section of politicians in America were already making such a demand, the archbishop said.

It was unthinkable, said Archbishop Jullien, that England would ever agree to a demand from the United States for the British West Indies. Nevertheless public opinion should be prepared.

Free State Elections

Dublin Municipal Vote Indicates Swing Away From De Valera

Dublin, Irish Free State.—Supporters of President Eamon De Valera's Republican Government in the Irish Free State are worried by failure of their forces to gain victory in the Dublin municipal elections.

Results of the election showed the city preponderantly in favor of the Nationalists and Independents who support former President William T. Cosgrave. Besides returning Lord Mayor Alfred Byrne, an Independent ally of Mr. Cosgrave, the electors gave seats to 22 Nationalist and Independent candidates and only 13 to adherents of the De Valera regime.

The Nationalists hailed the result as indicative of a swing away from the Republican Government.

Ontario Dentists Robbed

Niagara Falls, Ont.—Five dental offices in Hamilton and Niagara Falls were broken into and ransacked for gold leaf, gold scrap and false teeth by thieves. At Hamilton loss to three dentists through theft amounted to close to \$400.

CENTRIST PARTY IN GERMANY IS DISSOLVED

Berlin, Germany.—Former Chancellor Heinrich Brüning announced the dissolution of the Catholic Centrist party, last non-Nazi political party in Germany.

A laconic statement issued by him said: "The Centrist party has dissolved itself in agreement with the chancellor (Hitler)."

The extinction of the Centrists marks the end of the parliamentary party system in Germany as well as the end of political Catholicism. The Bavarian People's party, allies of the Centrists, quit the political scene. Between these parties held 88 of 584 seats in the pre-Hitler parliament.

The Volkspartei, or People's party, of the late Chancellor Gustav Stresemann, which had only two reichstag seats but was formerly much more powerful, also announced its dissolution.

These parties followed the lead of the Nationalists, who had combined with the Nazis in establishing the new regime last January, in voluntarily disbanding. The Nazis themselves had previously outlawed the communists, socialists and stateparties.

BUYING POWER OF WHEAT IS UP FIFTY PER CENT.

Winnipeg, Man.—Purchasing power of wheat in western Canada over "things that farmers buy" today stands at 70 per cent. of the 1913-14 price, compared with 40 per cent. in mid-April and only 22 per cent. as December 16, last year, when wheat fell to 38 cents per bushel in Winnipeg market and touched the lowest point in the history of the grain trade.

These figures are shown in the farmers' index chart compiled by the Searle Grain Company Limited. Index figures on livestock show cattle with purchasing power of 59 per cent. of the pre-war price; hogs 53 per cent.; and lambs 73 per cent.

Price of wheat used in the compilation is that paid to farmers at elevators in western Canada for No. 1 Northern on the basis of 25 cents per 100 pounds freight, which is 15 cents a bushel.

In the things farmers buy are listed 146 items essential to an average grower in the west to carry on production.

There are 16 items of groceries, 37 items of clothing, 29 items of household equipment, 51 items of farm equipment, 11 items of farm machinery, and two items of municipal taxes in the list.

The compilation notes that the index of things farmers buy is still 127 per cent. of the 1913-14 level.

Tax Compacts

Duty Boosted On Imported Powder Puffs

Ottawa, Ont.—Milady's aids to beauty are going to cost her more. Recently the Minister of National Revenue boosted the excise tax on imported compacta and powder puffs from 3 to 10 per cent. More than that, this assault on the diminutive vanity case is retroactive to March 22, 1933, so that if Miss Canada has not already paid her 10 per cent. on the former compact, the importer will be required to do so.

The increased tax applies to compacta, compact cases, or vanity cases, whether or not they contain any toilet preparation, and on powder puffs and powder pads.

Woman Will Supervise Refueling Of Monoplane

Minneapolis Girl To Aid Post At Two Siberian Points

New York.—Miss Fay Gillis, 23, of Minneapolis, will direct the refueling of the government monoplane, "Winnie Mae of Oklahoma," at two Siberian points on his projected world solo flight.

Lee Trenholm, Post's representative, said Miss Gillis had left Moscow on June 25 for Novo-Sibirsk, where the aviator plans to stop after leaving Berlin. While Post eats and takes a short nap, she will supervise replenishment of the gas tanks and any adjustments the plane needs.

Trade With Russia

British Government To Take Into Account Anglo-Canadian Agreement

London, Eng.—A questioner in the House of Commons was assured by a government spokesman that in trade talks between Britain and Russia, the British government would take into full account Article 21 of the Anglo-Canadian trade agreement.

This provides that where the imperial preferences are endangered by the importation of products sold at an undue price because of state subsidies or state production, such commodities will be prohibited entry.

R.C.M.P. Promotions

Ottawa, Ont.—Two promotions to the rank of acting superintendent were announced from headquarters of the Royal Canadian Mounted Police here. Inspector V. A. M. Kemp, adjutant of the force here, and Inspector Herbert Darling, assistant to the director of criminal investigation in Ottawa, receive these appointments as from July 1.

King Opening Big Dock

Southampton, Eng.—The greatest dry dock in the world, built at Southampton for the Southern railway at a cost of \$10,000,000, will be opened by the King July 26. During the construction of the dock 2,000,000 tons of earth and mud were excavated from the site and 750,000 tons of concrete were used.

Light For Plant Growth

Various Varieties Respond Differently To Time Of Exposure

It did not require any "Blue plant" from scientists for farmers to know that plant growth depended on day-light, but what they did not know was that different species and varieties responded differently to the length of time they are exposed to light. It is only in recent investigations that scientists have recognized this fact, which is of particular importance to those who are growing flowers and vegetables under glass.

According to J. E. Bower, of the Dominion laboratory of Plant pathology at St. John's, N.C., plants that bloom naturally in the long day period, will come more rapidly into flower (under glass) by increasing the length of day by artificial illumination. On the other hand, plants that naturally bloom during that period of the year when days are short, may often be induced to bloom under glass if the length of day is artificially shortened by shading.

Apparently the plants respond to what they recognize as their natural conditions, as did the hens which went to roost when the sun was in eclipse last summer.

In addition to those plants which are affected by long or short day periods, there is a third group, which cares little or nothing whether the sun shines much or less.

Another effect of artificial light in the greenhouse is to check certain greenhouse diseases such as mildew and leaf mould, which otherwise are apt to develop during dull days. Also the artificial light on dull days tends to harden the tissue and develop the root system of the plants.

Technical agriculture is taking advantage of electrical lighting and shading to synchronize the blossoming time of varieties they wish to cross. For instance it might be difficult to cross early and late varieties of peas if it were not possible to advance or retard the bloom by this artificial means. In all plant breeding and disease work, artificial illumination has been of the greatest practical importance, cutting down the length of experiments by years.

To get their reaction to more or less light, dozens of varieties of plants have been tested out together with their cost per kilowatt hour at the St. John's experimental station. The maturing period has been speeded up as much as ninety days in some cases retarded by the extra light.

As there are many acres of plants under glass in Canada today, the result of this investigation is of much importance to the growers, as well as to the scientists who are developing new species, or studying diseases.

Steady north light has long been considered essential for grading grain. Now according to tests that have been made by the National Research Council, artificial lighting units have been perfected which are as good as daylight, and more uniform, for even at the best daylight changes from hour to hour.

Electricity has extended the hours which humans work and it may be that some humans would work more effectively if the hours of daylight, natural and artificial, were restricted as has been found to be the case with plants.

Eligible To Compete

In Broncho Contests

Nine Canadian Champion Riders To Compete At Chicago Rodeo

Nine Canadian champion broncho riders have been certified as eligible to compete in the broncho riding contests at the World's Fair Rodeo at Soldier Field, Chicago, August 25 to September 10, it has been announced. Three other Canadian cowboys are included in the list of alternates.

Canadian cowboys eligible to enter, in the order of their standings are: Bronco riding, Pete Knight, Crestedhead; Harry Knight, Calgary; Canada Kid, (Lee Fortie), Calgary; Herman Linder, Cardston; bareback bronco riding contest, Smoky Smiler, Kimberley, B.C.; Huckle Long, Battleford; Geo. McIntosh, High River; Herman Linder, Cardston, Sask.; Canada Kid, Calgary. Included in the list of alternates are: Sykes Robertson, High River, in the bronco riding contest, and Frank Sharp, High River, and Pete Forrester, Calgary, in the bareback bronco riding contest.

Losses from fire in London, England, last year totaled \$3,304,025.

A wise man would rather be ignored than bored.

Mexico has enacted a law to prevent speculation in exchange.

W. N. U. 2002

ENGLAND DEVELOPS NEW TRANSPORT PLANE

Our picture shows a new transport plane which has been built for the British Air Ministry, undergoing trial flights at Mouchell Aerodrome, Norwich. This giant machine has been designed to carry 1,000 pounds of mail for at least 1,000 miles, and has a cruising speed of more than 150 miles per hour. Its top speed is more than 200 miles an hour.

Mystery Man Of Europe

Even Nationality Of Munitons King Is Not Clear

Sir Basil Zaharoff is called the mystery man of Europe because little is known of his origin. Even his nationality is not clear. But it is known that he is one of the largest owners of munitions stock in the world. His life is nearing its end and it is said he gives away millions for charity, seeking to make amends for the men who have been killed in the wars he has encouraged and the men and women who have committed suicide after losing everything they owned in the big casino at Monte Carlo, owned by him.

He took to the munitions business early in life and history shows him to have been peddling arms to Japan before 1904. A sale of \$25,000,000 to Spain put him on his feet. Then he gained control of Vickers; he bought armament plants in almost every large country in the world, including Canada; he was part owner of the famous German Krupp. He took over the sale of Maxim's machine guns, and while Maxim sold them to the United States, Zaharoff sold them to Spain during the Spanish-American war. Before 1914 his plants were manufacturing war implements as quickly as they could be made. To every country he sold. Then came the great war, the crowning achievement of his life. Millions upon millions of dollars poured into his coffers. To his country he sold his guns; to the other he loaned money—all for the purpose of killing. He apparently sided with the allies, became a bosom friend of Lloyd George and was knighted by the King. After the war business in armaments slumped. But Sir Basil had other irons in the fire. He bought Monte Carlo and made it pay huge dividends. He purchased great tracts of land where oil could be obtained. He threatened the supremacy of Rockefeller and the Standard Oil Company of the United States and of Sir Henry Detering the oil king of Europe; he became a second J. P. Morgan. Today he sits in his magnificent Chateau de Balcourt, half blind, bent and gaunt, haggard and worn. But his brain still functions with all the precision of youth. He has given away millions upon millions of francs to charity and other organizations. It is said that he is determined to make amends for all those who have succeeded in his gambling rooms at Monte Carlo.

Efforts To Save Drowned

Artificial Respiration Should Be Continued Four Hours Or Longer

The Toronto Mail and Empire says: We pointed out recently the necessity of continuing, until rigor mortis or stiffening of the body, efforts to resuscitate persons who apparently are drowned. The advice is emphasized by the Metropolitan Life Insurance Company in an advertisement which appears in Collier's Magazine:

"Continue artificial respiration for four hours or longer if necessary. When changing operators, do so without losing count. Not infrequently, the patient, after temporary recovery, stops breathing. Resume artificial respiration at once. Thousands upon thousands of lives have literally been snatched from death by this method of life saving. As a world-famous physiologist puts it, 'Often, in drowning, electric or gas cases, the vital machine merely needs to be started again. It is like cranking an automobile when the engine has stalled and the self-starter is out of order.'"

Unusual Out Exhibit

Competitor At World Grain Show Is Scottish Woman

Oat farmers of Canada are challenged by a woman farmer from Scotland.

One of the entries in the competitive classes at the World Grain Exhibition in Regina is Mrs. Maggie Eccles of High Plinmore, Maybole, Ayrshire.

She has entered a sample in the oat section from a farm which has been in her family for over 60 years. Mrs. Eccles operates a 20-acre farm close to the birthplace of Robert Burns, the poet, special attention being paid to oat production.

In 1931 Mrs. Eccles won the gold medal for grain at the national stock and grain show at Edinburgh.

Estimating His Salary

A well-known attorney was always lecturing his office boy, whether he needed it or not. One day he chanced to hear the following conversation between the boy and the one employed next door:

"How much does your chief pay you?" asked the latter.

"I get \$1,500 a year. Five dollars a week in cash and the rest in legal advice!"

Transits through the Panama Canal are increasing.

Definition: A spendthrift is one who uses an adjective in a telegram.

Altering War Memorial

Position Of Gun Limber Made Some Changes Necessary

Canada's national war memorial is being altered in accordance with suggestions of the Prime Minister. It is learned. The memorial stood in Hyde Park, London, England, for about a year, but has now gone back to the March Brothers' studio for changing. When completed the memorial will be brought to Canada, although a site has yet to be definitely selected.

Instructions issued by Premier Bennett for the alterations to be made to Canada's national war memorial were made at the request of the officials of the Department of Public Works and were designed to eliminate a curious anomaly that had developed in the construction of the memorial. The general theme of the sculptured group is the passage of uniformed figures through an arch. In the rear, and just entering the arch, is a gun limber. However, as the memorial had developed, it was noted the limber was so placed that it would have been utterly impossible for it to pass through the arch.

This defect is being remedied by the simple process of enlarging the arch. To do so, and maintain the uniformity and harmony of the group, three more figures are being inserted.

Heat For Tuberculosis

Doctor Tells Of Patients Improved By Its Use

Possibility of the treatment of tuberculosis by use of hot baths and high frequency waves was presented before the American Sanatorium Association when Dr. E. S. Mariette of Minneapolis, member of the committee on treatment, described experiments he had conducted in this field.

A majority of a number of patients who had undergone the hot bath or high frequency treatments over a brief period had shown marked improvement, according to Dr. Mariette. Of seven who had taken hot baths over a month, six had shown X-ray improvement, in some cases marked, and of three who had been given high frequency treatments two had shown improvement. All of the patients had been in sanatoria for years without showing any improvement whatever.

London's bill for police protection last year totaled over \$48,000,000.

Norway's foreign-trade balance is showing a favorable trend.

An Interesting Race

Old Barges On Thames Take Part In Contest For Championship

The art of growing old gracefully and of showing a bustling world that the claims of sport are not the monopoly of youth was demonstrated at London, England, when coaster, bowsprit and staystail barges took part in the race for the championship of the Thames. The course is from Lower Hope Point to the Mouse Lightship and back to Gravesend, a distance of almost 60 miles. Most of these representatives of an industry whose genealogy goes back to the 14th century, are in the prime of barge life, which records show, in one case at least, is 130 years.

Of those who earn their living on the river, the bargemen are remarkable for the small number of casualties they have compared with the great risks they run. Whether they are groping their way among the miscellaneous craft in the pool or tackling to and fro the river amid a procession of steamers in the lower reaches, the masters appear to have nerves of steel to overcome the hazards they take. On to the shore they almost steer before turning their craft about to be diagonally across, their massive ruses mainmasts full, with the waters washing the scuppers on the leeward side.

For the last fortnight or more before the race the barges go through a severe preparation, and their crews work hard to achieve the degree of quickness required throughout the contest. There is no flying start as in yacht racing. All the barges are anchored in a line, and at the signal to go the winches screech until the anchors break the surface and are safely stowed. Then the master's task begins; orders are shouted and instantly obeyed; the massive mainmast unfolds from the great spirt like the draping of a theatre curtain as he guides his barge into the wind. Arms shoot up and down before the mainmast as some canvas is heaved aloft.

A beautiful scene meets the eye as this miniature fleet of river and coasting barges, the latter carrying a greater area of canvas, sweeps to windward, the blackheaded hulls giving relief to the muddy waters which are whipped into a foam of dirty white as the barges cut their way through the broadening lane of the river past the Nore and onwards to the Mouse Lightship. There they wheel around almost in the twinkling of an eye, and the most exciting part of the race begins on the return for home.

All the arts of legitimate sailing are brought into use; the tacking and blanketing as one competitor after another seizes an opportunity for advantage. Round the tortuous bends of the river they glide, until at length the final lap marked by the Ovens buoy brings them into Gravesend Reach. A few minutes more and victory is won amid the shrieking sirens of the tugs and ships.

Parts Of Steamer Salvaged

Dredge Brings Up Bits Of "Independence" Wrecked In 1853

Hull of the "Independence," first steamer to ply Lake Superior, has been encountered by the Duluth Superior Dredging Company, operating on the United States side of the Vidsa Shoals, above the ship canal.

The "Independence" was wrecked November 22, 1853, when her boiler blew up and four men were killed. Weeks ago bits of oak planking, copper plates, pipe fittings, and hand wrought iron rings were salvaged. It was the first salvage operations on the historic steamer since divers brought up material for world-fair exhibits in 1892.

The "Independence" was built at Chicago and brought to Michigan Soo in the fall of 1845.

Touring World On Bicycle

Retired Liverpool Policeman Has Already Visited 28 Countries

With his entire belongings strapped to the bicycle, an ex-policeman, aged 65, rode up to a ship at Liverpool and embarked on a five months' world tour.

He was John R. W. Crawford, of Sunderland, and he was sailing for Halifax on the Furness Witherly liner "Newfoundland."

Since he retired from police service in 1919 Mr. Crawford has made cycling his hobby, and has visited 28 countries on cycle tours, covering 130,000 miles.

He will spend three months in doing the 3,000 miles across Canada, and will then go on to Japan to continue his world cycle tour.

Archaeologists have unearthed a kitchen sink said to be 3,700 years old.

Simplified English

Ordinary Conversation Can Be Carried On With 850 Words

Foreigners state that they find learning the English language very difficult. Possibly that is not because of the number of words, which are plenty enough in all conscience, for the new Oxford dictionary is said to contain over half a million, but the variations in spelling and pronunciation are exceedingly trying. Words ending in "ough" can be pronounced in various ways, "ci" and "ch" may be hard or soft, and plurals are tricky things. As a Frenchman once said: "If the plural of mouse is mice, why isn't the plural of house mice?" We give it up.

An Englishman, C. K. Ogden, of the Orthological Institute, Cambridge, has been working for ten years on the production of a simplified English language. He calls it "Basic English," and it consists of only 850 words. He can put them all on one sheet of paper, and he claims that ordinary conversation can be carried on by these words.

His 850 words include 600 names of things. One hundred and fifty words supply all the necessary adjectives. Eighty-two words cover all the prepositions, pronouns, conjunctions, and adverbs. There are only 18 verbs which Ogden calls "operators."

The whole of the grammar could be summarized on a postcard as follows:

1-Plurals in "s."

2-Derivations in "er," "ing," and "ed" from 300 nouns.

3-Verbs in "ty" from the adjectives.

4-Degree with "more" and "most."

5-Questions by inversion or "do."

6-Conjugation of pronouns and the 18 verb forms. Measurements, numerals, currency, calendar, and international terms are used as in English.

It is claimed for basic English that the normal intelligent foreigner between 18 and 21 can master it in 30 days. For the English-speaking person, who has to learn to eliminate and not add new words, the time is slightly longer.

Of course, this does not allow for the needs of the grandiose speaker, the magnificent orator, but for the ordinary man-in-the-street. As a matter of fact a large percentage of people do not use more than that number of words or a great many more. Even well educated people seldom go beyond 5,000. If the most erudite of specialists were to write down every word he knows his list would not extend beyond 10,000.

It would be a good thing if education limited our knowledge of the language to 5,000 words. Then, perhaps, the use of our Parliamentary and platform windmills would not take such a long time to say what's on their minds.—St. Thomas Times-Journal.

New Method Is Effective

Scientist Explains Why Certain Noise Will Sterilize Milk

If you hear an ear-splitting shriek as you are passing a dairy in a few months' time, don't rush to the rescue or send for the police. It is quite true that the noise will be taking place, but the victims will not be men or women—only microbes. The shriek is not given out by them. It is, so to speak, put into them, and it does more than annoy them; it blows them to bits.

Many ways of sterilizing milk have been invented, but the "shriek" method is the most effective.

But why should a noise kill microbes? Put a hand just between a friend's shoulder blades when he is talking and you will find that you can feel his back vibrating strongly. Those vibrations come from the sound waves made by his vocal chords. All sounds are caused by vibrations; the quicker the vibrations, the higher the note.

It occurred to a scientist that if microbes could be made to vibrate sufficiently quickly they would be destroyed.

He started experiments and soon found that his idea was correct. All that remained was to discover the note which produced the most effective vibrations. He then tried applying the shrieker to milk that was full of microbes. So successful was the experiment that milk can be creditably sterilized by letting it flow over the metal tube that is producing the shriek.—Tilt-Bits.

The French mine-laying submarine "Diamant" was launched recently at Moulins.

One may have good manners but not carry them about with him.

A secret is either too good to keep or not worth keeping.

The sixteen months old son of Mr. and Mrs. Ed. McArthur of Summit Hill district, was seriously injured on Wednesday morning, when he was stepped on by a work horse. The child tottered out in front of a team of horses that were working in the field and before he was noticed he had been knocked down and stepped on by one of the horses, causing a five inch gash at the back of his head. Dr. Williams dressed the wound and had him rushed to the General Hospital, Calgary.

Local News

Stanley Reid returned from the coast on Monday.

Alex Smart left last week on a holiday trip to the coast.

Mr. and Mrs. J. R. Gilchrist and family spent Sunday with friends at Carstairs.

Cora Hall, Melva English and Norma Miller left on Wednesday to attend the C. G. I. T. camp at Chenequa, near Morley.

Winnie Tredaway, a member of the Junior Woman's Auxiliary was successful in winning a second prize for needlework in competition with members from all over the Dominion for girls from 11 to 13.

It looks as if Dick Nichols got hold of a live one at last, at any rate he sold his Ford coupe to Hughie McIntyre. Now you can laugh, Dick.

The Sunday School picnic of the Anglican Church was held at Bowness Park last Wednesday. About 40 in all attended. Thanks are due to Messrs. Reeves, Tredaway, Arnott, Mrs. Wigle and Rev. Currie for conveying the party.

Hall McCaskill recently completed building a warehouse for the British American Oil Co. at Madden.

Miss Margaret Murdoch and Miss Kathleen Mair left on Tuesday to spend a few days at Sylvan Lake.

Mr. and Mrs. Duncan Morrison and daughters Gertrude and Dorothy of Olds were the guests of Mr. and Mrs. A. W. Gordon on Sunday.

Mrs. E. Cartwright, Miss Cartwright, Mrs. Currie and Violet are spending a few days in Calgary visiting relatives.

Mrs. L. Ableman and Edna left Wednesday for a week's camping at Sylvan Lake.

Mrs. H. R. Fitzpatrick and daughters, Margaret and Kathleen, left on Saturday for Sylvan Lake.

Mrs. D. H. McFadyen returned to work on Monday after a week's holiday. Miss Stella Gordon assisted at the post office during her absence.

Mrs. J. Halliday and son, Wallace, of Minneapolis, are visiting at the home of Mr. and Mrs. A. A. Halliday.

Mrs. A. A. Halliday, Mrs. J. Halliday and Wallace Halliday were visitors at Banff and Lake Louise last week.

Phyllis Jarman returned to her home at Calgary on Sunday after spending the past week the guest of Arlene Amery.

Arlene Amery is spending the week at Calgary the guest of Phyllis Jarman.

Mr. and Mrs. Wm. Urquhart returned on Tuesday after spending a week at Pine Lake. Bill reports the fishing good and brought back a number of choice pike. He recommends Pine Lake as an excellent place to go for a holiday.

A meeting of representatives from Crossfield, Carstairs and Didsbury Tennis Clubs was held on Tuesday evening at Didsbury to draw up rules governing the challenge cup. Olds was not represented.

A set of rules was drawn up for the balance of 1933 and a meeting deemed advisable as early as possible in 1934 to make any amendments found necessary. It was decided that the cup should be purely a challenge cup—at any rate for the balance of this year—and be called "Quo Vadis" Tennis Challenge Trophy.

The special dance in East Community Hall on Friday last was a grand success. Supper was served in the open at midnight, and here and there burned a camp fire. It was a pretty setting, and then to top it off, the singing cowboy did his stuff. The jittery dances and prizes proved popular with the large crowd.

Examination Results

The following are the results of the promotion tests of students attending the Crossfield School.

From Grades I to VI inclusive the promotions are as shown. In Grades VII the pass per unit mark is 50 while in Grade VIII, the pass mark per unit is 40; in each case there must be an average of 50. Students not obtaining these requirements will have to repeat the grade.

In the high school grades the pass mark is 50 on each unit, irrespective of average mark. The units marked in Grade X were Literature I and Composition II. Grade IX units include Literature I, Composition I, History I, Science I, Algebra I, French I.

All other units of the high school are being marked by the Department.

D. Tweedle, Principal.

COMMUNICATIONS

Editor Crossfield Chronicle:

School matters in our district are much in the limelight at present and it makes one wonder just what is the matter. When your car is in good shape there are no knocks, no rattle, but noise and jars, which cause even the bystander to wonder, cause the wise driver to consider an overhaul.

I understand that in spite of widespread dissatisfaction in regard to the quality of the work in two of the rooms, the trustees intend to carry on with no changes. Without doubt the prospect for the coming year is not bright for either teachers or pupils.

Hearty co-operation between parents and teachers is recognized as essential to the success of the school, and I earnestly appeal to both trustees and teachers to consider the path ahead before entering upon the work of another year.

Boys' and Girls' Calf Club

The picnic held at the C. Havens farm on Friday last was a decided success. Supervisor W. J. Elliott gave the boys and girls a good lesson in stock judging on animals handled for the occasion by Mr. Havens.

Unfortunately a few of the members could not be present and these are losing information that will be valuable when the time comes to pick out the team to represent our Club at Edmonton.

The lunch provided by the ladies was enjoyed by all, and the ice cream made by Mrs. Havens was especially appreciated.

The next lesson will be held on July 31st at a place yet to be decided upon.

The C.P.R. opened their new station here on Monday.
